

San Mateo + Cardinal Midstream: Strategically Integrated for the Next Phase of Growth

~48 Miles of Three-Stream Pipelines

60 MMcf/d of Processing Capacity

5 Water Handling Facilities

~410 Miles of Three-Stream Pipelines

460 MMcf/d of Processing Capacity

14 Water Handling Facilities

~815 Miles of Three-Stream Pipelines

1 Bcf/d of Processing Capacity

16 Water Handling Facilities

Note: Figures represent San Mateo midstream. All maps and figures as of year end 2017, 2022, and as of June 30, 2026, including the assets acquired in the Cardinal acquisition, which closed on July 31, 2026. Some tracts and pipelines not shown on map.

Complementary Systems Positioned to Deliver Solutions for Customers

97 Active Drilling Rigs Within 10 Miles of System

San Mateo Assets

~815 Miles of Pipeline

~1 Bcf/d Gas Processing Capacity

90,000 Bbl/d Oil Transportation Capacity

475,000 Bbl/d Water Handling Capacity⁽¹⁾

Operational Advantages for Customers

Three-Stream Pipeline System

Largest Private Natural Gas Processor

Operational Flexibility

Reliable Flow Assurance

Note: All acreage, pipelines, and figures as of June 30, 2026, including the assets acquired in the Cardinal acquisition, which closed on July 31, 2026. Some tracts and pipelines not shown on map. Active rig count within 10 miles of San Mateo pipeline system per Enverus as of July 30, 2026.
(1) Water handling capacity does not include the Hades recycle facility with a daily capacity of ~100,000 barrels.
